

HIPAA Eligibility Transaction System (HETS) 270/271

ASC X12N 5010 Errata Release Summary

Document Version 0.1
Implementation Date: April 2011

HETS 270/271 Release – ASC X12N 5010 Errata

Summary of Impact on Trading Partners

The purpose of this summary document is to inform submitters of upcoming changes to the HETS 270/271 application based on the Final Rule for the modifications to the ASC X12N Version 5010 Health Insurance Portability and Accountability Act (HIPAA) Electronic Transaction Standards.

The Final Rule for the 5010 Errata has been posted to the Federal Register at this link:
<http://www.gpo.gov/fdsys/pkg/FR-2010-10-13/pdf/2010-25684.pdf>.

Submitters may begin testing with the original 005010X279 version of the 270 eligibility request transaction on January 1, 2011. Testing with the Errata version (005010X279A1) will commence in April 2011. Submitters may begin the migration to Production in April 2011 following successful completion of the 005010X279A1 transaction testing.

Prior to the migration to Production in April 2011, Submitters will be allowed to submit a limited number of test transactions.

HETS 270/271 Data Element Changes

Effective with the April 2011 release, the HETS 270/271 application will change to accept or return, as appropriate, new and updated codes values. Table 1 describes the ASC X12N 5010 Errata changes to existing data elements within the 270, 271 and 999 transactions effective with this release.

Table 1 – Transactions, Data Elements and Changes based on the ASC X12N 5010 Errata

Transaction	Data Element	ASC X12N 5010 Errata Change
270	GS08	Valid code value changed from 005010X279 to 005010X279A1
270	ST03	Valid code value changed from 005010X279 to 005010X279A1
270	2100C NM102	Addition of code value: 2 – Non-Person Entity
271	GS08	Valid code value changed from 005010X279 to 005010X279A1
271	ST03	Valid code value changed from 005010X279 to 005010X279A1
999	GS08	Valid code value changed from 005010X231 to 005010X231A1
999	ST03	Valid code value changed from 005010X231 to 005010X231A1
999	CTX06-2	Element usage changed from “Situational” to “Not Used”
999	IK502	Addition of code value: I5 – Implementation One or More Segments in Error
